# AHE 3000 series extruded handrail engineering data

Using extreme pressure, the 3" extruded is tightly roll formed and clad with a minimum .024" thick sheet metal in the finish of your choice.

The channeled aluminum extrusion design of these handrails allows for easily adjustable spacer locations that can be slid along the length of the handrail and locked into place.

Textured metals by

## exterior cab mounting spacer

### PULL-OUT VALUES for 3/8" STUD

Handrail Thread-lock fastener engineered test data  
Pull-out values for removal of threaded fasteners  
from Lustre Products' handrails = 1509 lbs

## in cab (removable) mounting spacer

### PULL-OUT VALUES for 1/4"-20 BOLT

265 lbs (120 kg) ultimate tensile load in 1/2" drywall  
306 lbs (162 kg) ultimate tensile load in 5/8" drywall  
925 lbs (420 kg) ultimate tensile load in concrete block  
1,283 lbs (583 kg) ultimate tensile load in steel plate

Tests by independent test laboratory show ultimate load. Industry safety standards recommend 1/4 of the values for actual applications. Age and conditions of substrate will cause load values to vary.

## In Cab Removable Handrail Spacer Installation Instructions

## Handrail Weight

SHIPPING WEIGHTS = Handrail physical weight calculations = 1.62 lbs per lineal foot (0.73 kg / 30.48 cm)  
Spacer assembly = 0.58 lbs (0.26 kg) per spacer

ACTUAL WEIGHTS = Average assembled and packaged shipping weight = 2.48 lbs per lineal foot of handrail (1.13 kg / 30.48 cm)
