Safety Service Barricade: Is a lightweight, easily transportable, attention getting temporary barricade system. It is 42 inches high with either six (Part# SSB6), four (Part# SSB4) or three (Part# SSB3) 30 inch wide panels. Each sturdy panel weights 3.5 lbs, easily assembled and carried to desired location. For storage, the hinged units easily fold together in a compact way, allowing for maximum capacity in a minimum space.

Features & Benefits

Additional Features:

Presents a pleasant and professional look. Provides an effective and attractive visual warning. Convenient compliance with safety standards. Reduces exposure to public liability claims and worker injuries. Barricade is held rigid by stabilizing structural locking pins. Suction cups keep barricade attached to device.

Removable
Lock Pins
