Jamb Plates:

Versatility is the key word for our line of economical plastic jamb plates. This product meets all accessibility code requirements while offering many advantages to stamped or cast plates.

Material:

Manufactured from durable solid color acrylics, there is no painting of characters or plate background which can be damaged though use or rubbed off by abrasive cleaners.

Size and colors:

Standard stock configurations, 3" x 4" and 4" x 4" plates. All characters are 2" tall with recessed corresponding International Braille specifications. Characters come in White or Brushed Silver on a black background.

Additional Advantages:

- All edges are fully beveled to significantly decrease any attempt of vandalism or theft.
- Braille is easy to locate and read within a "Braille cell", machined to exact specifications.
- Plastic substrate enables the jamb plate to actually flex and make full contact with any irregular (concave or convex) door jams.
- Full adhesive "peel & stick" backing utilizes a VHB adhesive with an integral polymer liner for instant secure bonding with unmatched shear strength.
- Endless character configurations, unusual designations of numbers and text as well as alternate language combinations.
- No tooling/die or design changes for unusual characters or numerals.
