

ATL-150 Imperial Escalator Step Gap Gauge

FEATURES:

- Anodized aluminum coating to protect against corrosion and wear
- Color coded red for easy imperial tool identification and use
- Safe handle design will not entrap fingers if there is accidental movement of escalator step
- Imperial gauge (red) allows for full range of measurements: 1/16, 3/32, 1/8, 5/32, 3/16, 7/32, 1/4, 9/32, 5/16, 11/32, 3/8, and 7/16 inch
- Precision CNC machined and sized for accurate step to balustrade/skirt gap compliance
- Straightforward design and use: accurately measure the gap on each side of the step against the balustrade/skirt. Ensures that each side of the escalator step does not exceed allowable gap tolerance or combined gap tolerance of both sides.
- Add your own custom logo, graphic, text, or color (minimum order required)
